PROFESSIONAL SUMMARY

MERN Stack Developer with 1.8+ years of experience building responsive web applications and REST APIs using React.js, Node.js, Express.js, MongoDB, TypeScript and Next.js. Hands-on experience with Web3 wallet integration (MetaMask, Trust Wallet) and blockchain-based transaction systems. Immediate joiner.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Context API, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Mongoose

Database: MongoDB, MySQL, Redis

Web3: Web3.js, MetaMask, Trust Wallet, Smart Contract Integration

Tools: Git, GitHub, GitLab, Postman, Docker, AWS (basics), CI/CD

PROFESSIONAL EXPERIENCE

MERN Stack Developer – AllHeart Web Pvt Ltd **Jan 2026 – Aug 2026**

- Built and maintained full-stack Web3 applications using MongoDB, Express.js, React.js and Node.js.
- Developed a blockchain wallet transaction system with smart contract integration for secure payments; integrated MetaMask and Trust Wallet for multi-wallet connectivity.
- Designed 10+ RESTful APIs, including authentication and transaction-tracking endpoints, improving response times by 35%.
- Built responsive React.js interfaces, improving page load speed by 20%.
- Fixed 20+ critical bugs, reducing production issues by 30%.
- Worked with Git and CI/CD pipelines in a microservices-based architecture.

MERN Stack Developer – Appin Technology **Nov 2024 – Dec 2025**

- Built and deployed full-stack web and mobile applications using React.js, Node.js and MongoDB.
- Designed admin dashboards that improved data management efficiency by 30%.
- Reduced API response time by 40% through query optimization and caching.
- Implemented JWT-based authentication and authorization to strengthen access control.
- Used Redux and Context API for state management, reducing unnecessary re-renders and improving responsiveness.

PROJECTS

CRM Dashboard – Client Management Platform

React.js, TypeScript, Node.js, Express.js, MongoDB, Redis, Docker

- Developed a CRM with 5+ modules: support tickets, ETA tracking, general settings and client billing.
- Built a global settings module for instant config propagation across modules, using Dockerized services and Redis caching.
- Implemented onboarding workflows and authentication across a microservices architecture with 10+ services.

SapherChain – Blockchain Explorer

React.js, Node.js, Web3, MongoDB, REST APIs, MetaMask

- Built a blockchain explorer to monitor real-time blocks, transactions, wallet addresses, validators and network activity on the GPoS network.
- Integrated blockchain RPC/APIs to display transaction status, block details, balances and validator information.
- Implemented search by wallet address and transaction hash with a responsive UI.

SapherCoin Wallet – Web3 Wallet

React.js, Node.js, Web3, MongoDB, REST APIs, MetaMask

- Developed a secure Web3 wallet for managing SapherCoin assets and blockchain transactions.
- Integrated wallet connectivity for sending, receiving and monitoring digital assets, with transaction history and wallet management screens.

EDUCATION

Master of Computer Applications (MCA) – Mangalayatan University **2024 – 2026**

Master of Arts (MA) – IGNOU **2020 – 2022**

Bachelor of Arts (BA) – Delhi University **2016 – 2019**
